

## Publish Data to IBM Cloud

Team ID	PNT2022TMID03981
Project Name	Smart waste management system for metropolitan cities

Step 1: In the python script give the IBM credentials like org id, device type, etc. to connect to IBM cloud

Step2: Open your cloud account and open Watson platform

Step 3: In the specified Device Type mentioned in python script shows connected

Step 4: Then click on Recent Events and observe the Output data

## Screenshot:

The screenshot shows the IBM Watson IoT Platform interface. The top navigation bar is dark blue with the text 'IBM Watson IoT Platform'. Below it is a sidebar with various icons. The main content area is titled 'Device Drilldown - BIN1ID' and features a 'Back' button. The left sidebar contains a list of navigation options: Connection Information, Recent Events (selected), State, Device Information, Groups (with a 'beta' tag), Metadata, Diagnostics, Connection Logs, and Device Actions. The main content area is divided into two sections: 'Recent Events' and 'State'. The 'Recent Events' section shows a table of events with columns for Event, Value, Format, and Last Received. The 'State' section shows a table of data points with columns for Property, Value, Type, Event, and Last Received. Below the 'State' table, there is a 'Device Information' section.

Recent Events

The recent events listed show the live stream of data that is coming and going from this device.

Event	Value	Format	Last Received
IoTSensor	{ "dist":47,"load":12 }	json	a few seconds ago
IoTSensor	{ "type":"Buffer","data":[34,97,108,101,114,116,...	json	a few seconds ago

State

This table shows a list of data points that are reported by this device.

⚡ Showing Raw Data | No Interfaces Available

Property	Value	Type	Event	Last Received
dist	47	Number	IoTSensor	a few seconds ago
load	12	Number	IoTSensor	a few seconds ago

Device Information
